Our team has a track record of rapidly identifying issues and problems by looking at your processes, procedures and policies so they can advise, recommend and provide solutions to increase your efficiency, effectiveness and profitability.

About Prince2 Project Management UK, India and Saudi Arabia

PRINCE2 is a process-based approach for Project Management providing an easily tailored and scalable method for the management of all types of projects. PRINCE2 is the de-facto standard for project management in the UK and is practiced worldwide including India and Saudi

Arabia. The continued international development of PRINCE2 Foundation and PRINCE2 Practitioner examinations, training and course material is contributing significantly to the recognition of PRINCE2 as a truly international standard. More and more people are having the opportunity to benefit from the PRINCE2 training courses and qualifications that are available in India and worldwide.

Why Prince2 For You

In today's challenging economy we all want to run effective and efficient projects without wasting the financial and other resources. We also want to improve our skills in managing projects and have a certification that's well recognized by the employers.

Now is the time to get Prince2 Project Management Certification and make yourself more marketable and appealing to the employers both nationally and internationally.

PRINCE2™ (Projects In Controlled Environments) training program (5 days) is a widely used project management method that navigates you through all the essentials for running a successful project. **PRINCE2™** is a flexible method and is aimed at all types of projects. It is a process-based method for effective project management.

Prince2 Certification

Foundation

- Key element in the PRINCE2 Foundation course is the PRINCE2 process model using the PRINCE2 Trigger Map.
- Delegates will be shown how the model is setup, how the different project activities and project roles are linked together and how PRINCE2 deals with exceptions that imminent to occur in any kind of project.
- During the PRINCE2 Foundation course delegates will learn how to set up a project management organization that is responsible for managing and planning the project.

- Delegates will be taught how to define the different project management roles to guarantee that the project is run in a most effective and efficient way.
- The method of ‘management by exception’ will play a crucial role in handling project issues. At the end of the course delegates can take the official PRINCE2 Foundation exam

Specifically:

- Understand the purpose and responsibilities of all roles.
- Understand the seven principles, the seven themes, the seven processes, and the Product-based Planning and Quality Review techniques.
- Understand which management products are input to, output from, and updated in the seven processes.
- Understand the purpose of all management products and the composition of the Business Case, Product Descriptions, Issue Report and the Issue, Risk and Quality Registers.
- Understand the relationship between principles, processes, themes, deliverables and roles within a PRINCE2 project.

Practitioner

- The PRINCE2 Practitioner course is aimed to measure whether a candidate could apply PRINCE2 to the running and managing of a non-complex project within an environment supporting PRINCE2.
- To this end the candidate needs to exhibit the competence required for the Foundation qualification, and show that they can apply and tailor PRINCE2 to address the needs and problems of a given project scenario.

Specifically:-

- Know or comment on detailed explanations of all processes, themes and techniques, and worked examples of all PRINCE2 management products as they might be applied to address the particular circumstances of a given project scenario.
- Demonstrate that they understand the relationships between processes, themes, techniques and PRINCE2 management products and can apply this understanding.
- Demonstrate that they understand the reasons behind the processes, themes and techniques of PRINCE2
- Demonstrate their ability to the tailor PRINCE2 to different project environments.
